ALGAE-THIN Muscle Activating Slimming Cream

Skin laxity commonly affects the arms, abdomen, legs and neck, making loss of firmness one of the most common aesthetic concerns worldwide.

Over time, reduced muscle activity can contribute to a loss of tone and firmness. **Restoring skin elasticity and improving body firmness requires a consistent approach,** and achieving visible results through exercise alone can be challenging.

ALGAE-THIN is an innovative cosmetic complex designed to help improve skin firmness and tone, inspired by the effects of physical activity on the body. Its active metabolites help stimulate muscle tissue cells, promote the release of fatty acids and support muscle fibre activity, contributing to a firmer, more toned-looking appearance without the need for intensive physical exercise.

OBJECTIVE

After 28 days of use, it specifically reduces the contour of the treated area without the need for exercise losing up to 3 kg without diet or exercise. It can be combined with moderate physical activity and healthy diet for unbeatable results.

In addition to its reducing properties, **ALGAE-THIN has an innovative texture that allows it to adapt to environmental conditions**, provides softness and smoothness to the skin, which makes visible the surface of the epidermis.

NATURAL ORIGIN: Product formulated with ingredients of natural origin. Vegan.
