ULTIMA

Anti Wrinkle Treatment with Acetyl Hexapeptide-8

Several factors cause facial aging. Whether hereditary, environmental, physiological changes or even by the very nature of the skin, these factors make appearance of wrinkles or fine lines from the 30 years of age unavoidable.

In addition, there are other physical factors, that we make unconsciously, such as expressions, frowning, the position in which we sleep, etc. that cause a contraction of the facial muscles, eventually generating the unwanted wrinkles or expression lines.

ULTIMA minimizes muscle contraction and thereby reduces the formation of fine lines and reduces wrinkles, thanks to the use of Acetyl Hexapeptide-8.

Cream

A nourishing, enveloping cream that combines powerful active ingredients with a unique sensory experience. Its formula helps improve skin firmness and elasticity, delivering a visible lifting effect and intense nourishment from the very first application.

Enriched with Acetyl Hexapeptide-8 and natural extracts of oat, daisy and blueberry, it helps soften the appearance of expression lines, even out skin tone, and enhance comfort and radiance. Skin looks smoother, revitalised and deeply nourished.

MAIN INGREDIENTS: Acetyl Hexapeptide-8, Avena Sativa (Oat) Kernel Extract, Bellis Perennes (Daisy) Flower Extract, Vaccinium Myrtillus Leaf Extract.
